

Web Contest Brief I have here a website mockup. If you need anything further please feel free to reach out to me! Thank you!

Current site: <http://outsourcemyit.com/>

We want it clean, concise and eye catching.

Menu: I want the same idea we used from quazarwebdesign.com with the logo in the middle and in the menu:

Home, About Us, How Can We Help?, Media, Blog, Contact Us.

Let's have the Social Media icons at the very top please.

For the banner - we want a thinkstock chess image sort of like thinkstock photo 122579353 or 77865526

I want the words "Outsmart, Outperform, Outlast" to come in one at a time and then "Outsource My IT" to show up on the banner.

Maybe have "Grow Your Business with Managed IT Services from Outsource My IT" somewhere permanently on the banner that still suits everything.

Services Section: Maybe we can have them as chess pieces with something along the lines of "Make Your Next Move" - Managed IT Services, New Jersey Cloud Computing, Protect Your Business Data, Managed Email Solutions (Background 514558306)

Next Area: What sets us apart?/Testimonials (I want this as a split area) (Can we please use the banner image paralex here?)

(This is for the What Sets Us Apart side)
Outsmart threats before they reach your networks.

Outperform with the newest and latest technologies to not only keep you up and running, but to keep you at an advantage.

Outlast by embracing Business Continuity with Outsource My IT by your side. (I will let you choose the background for here!)

Next Area: Book Your Free Two-Hour Review! (I want a form similar to the one on the old site.)

Next area: Blogs/Sign Up for our newsletter! (Again, please choose a relevant background)

Next Area: Contact Us area with service pages. I really like the contact us part in fcinq.com where it shows the geographical area.

Target Market Business Owners in New Jersey looking to outsource their business IT, computer and network support.

Look And Feel *Bold, Modern, Professional, Serious, Upmarket, Feminine, Colorful*
